

## ELDRIDGE /WEST OAKS SUPER NEIGHBORHOOD #17

**March 1, 2018**

Council Member Steve Le, District F

### Re: 2018 Eldridge/West Oaks Super Neighborhood (#17) CIP Requests

We, the Eldridge/West Oaks Super Neighborhood Council, submit our 2018 CIP Requests, into public record and present these to you, Council Member Le, at the District F Annual Capital Improvement Plan Budget meeting on March 1, 2018. . We hope council members will consider these requests when assessing funding for future projects.

- **Reconstruction of the streets in Section 6 of Ashford Park (Ref # 101002932350) )**  
Ashford Brook Dr., Ashford Creek Dr., Ashford Meadow Dr., Ashford Knoll Dr., Ashford Trail Dr., Ashford Park Dr.
- **Reconstruction of the streets/storm sewers in Sections 1, 2, and 3 of Parkhollow Place Subdivision (Crest Park, Waypark, Misty Park, Hazy Park, Hazel Park, Hollowcreek Park, Creekview Park, Creekside Park)**  
**(Ref # 101002935290 - streets)**  
**(Ref # 101002935292 - storm sewers)**  
Due to poor drainage and deteriorating streets in Sections 1, 2, and 3 of Parkhollow Place Subdivision, we are requesting complete street reconstruction, including storm sewers. Drainage is a major problem as some of the streets are sinking and cracking.
- **Reconstruction of Richmond Avenue from Dairy Ashford Rd. to Eldridge**  
**(Ref #101002933701 ) – Street Reconstruction**  
**(Ref #101002933703 ) – Storm Sewers**  
We request complete street reconstruction of Richmond Avenue (2 lanes each way ONLY) from Dairy Ashford Rd. to Eldridge, including storm sewers. We also would like intersection improvements for better traffic flow. Sections of this stretch of Richmond have seriously deteriorated. Parts of the road continually develop dangerous potholes and uneven road conditions. Because of poor drainage, flooding occurs during rainstorms between Meadway and Ashford Park Drive and also at Synott and Richmond. All these conditions are public safety issues for motorists, especially when vehicles have to suddenly stop, sometimes resulting in hydroplaning and other dangerous conditions.
- **Reconstruction of Dairy Ashford Road from Westheimer to Alief Clodine**  
**(Ref #101002933709– streets)**  
**(Ref #101002933707 – storm sewers)**  
We request complete street reconstruction, including storm sewers, of this section of Dairy Ashford Road. Older concrete panels have sunk and cracked and new asphalt patches have been applied. These asphalt patches do not last and concrete is the best long-term solution.
- **Eldridge from Westpark Dr to Alief Clodine (Ref # 101002935295) )**  
Remove the entire asphalt overlay on Eldridge from Westpark Dr. to Alief Clodine and repair the concrete areas underneath that are damaged, including storm sewers, if needed.
- **Extensive concrete repair of Westpark from Dairy Ashford Rd. to Eldridge (Ref # 101002932391 )**  
There are many concrete point/patch repairs needed on Westpark due to cracking and large areas of asphalt repairs. Therefore, we are requesting extensive concrete repair on this segment of Westpark.

Council Member Le, we thank you for your valuable assistance. Our Super Neighborhood looks forward to working with you on these CIP projects.

Sincerely,

Virgie Manning – 281-558-0131  
Infrastructure Committee
